EXPERIENCE ROBUSTNESS AND COMFORT

Meet the HD13 - a coach which will never let you down for many years to come. Simply enjoy a unique travelling experience thanks to the HD13's human and technologic centric features. HD13 is a game-changer and will help you shape a new, successful future for your business.

THE CONCEPT OF TRAVEL IS RE-IMAGINED

All journeys on HD13 offer a unique sense of quality thanks to its spacious interior design and adjustable seats. With its modern, comfortable seats and powerful air conditioning HD13 makes every journey a pleasurable one for

passengers while the drivers also benefit from a range of userfriendly features. The cockpit is ergonomically designed with robust features and additional safety systems which allows for an enjoyable and uninterrupted driving experience.

WHERE AESTHETIC AND POWER MEETS DYNAMISM

HD13 features a special uninterrupted chrome line determining the comfort space of the vehicle in a modern and aesthetic way.

The encircling chrome contrasts beautifully with the darkened wide windows to elevate the space for your passengers. Aesthetically designed headlights combine with rear wings to highlight the dynamic and powerful appearance of the HD13.

THE COCKPIT: STEP INTO AN UNRIVALLED DRIVING EXPERIENCE

The HD13 is designed to offer a comfortable and easy driving experience thanks to its ergonomic features and components.

The driver's seat is adjustable for comfort and functionality as well as featuring armrests, back support and a weight-sensitive pneumatic suspension system. The seat can easily be moved forwards, backwards, up and down to achieve the optimal driving position.

The HD13 takes the driving experience to the next level. In addition to advanced braking systems, the ACC (Adaptive Cruise Control) automatically adjusts vehicle speed and maintains safe tracking distance, enhancing both safety and driving experience.

OUTSTANDING COMFORT DESIGNED JUST FOR YOU

In the HD13 you can choose from a range of comfort features. With the HD13 you can adjust the seat capacity to your needs including a 57+1 and WC configuration. Other comfort features include wide, modern seats with a choice of textile and leather materials to maximise the aesthetic and comfort of

your coach. It ensures the comfort of all passengers with its wheelchair area and wheelchair lift. Air-conditioning controls, reading light and speakers offered in each seat can be customized to ensure pleasant journeys. You don't need to worry as HD13 is fully compliant with the PSVAR conditions.

MAXIMUM EFFICIENCY, MAXIMUM PERFORMANCE

The HD13 works harder for your business, and has a longer life. E6 DAF engine stands out with low fuel consumption and environmentfriendly performance. The 10.8 liter engine offers 2100 Nm @ 900-1125 rpm, generating 300 kW (408 hp) of power, and gives a truly maximized driving experience.

The emphasis is on better fuel efficiency and pure driving pleasure. The HD13 offers an ideal choice for the environment and your budget.

MEET HD13 WITH ITS IMPROVED SAFETY SYSTEMS

A GREAT JOURNEY BEGINS WITH
SAFE DRIVING EXPERIENCE. HD12 IS
YOUR RELIABLE COMPANION WITH
THE SAFETY SYSTEMS TO PROVIDE A
HIGH LEVEL OF SUPPORT.

ANTI-LOCK BRAKING SYSTEM (ABS)

allows the driver to apply the brakes suddenly yet without losing control. It prevents the locking of the brakes, reducing the stopping distance while also improving handling to ensure a safe driving experience even when sudden braking is required.

ANTI-SLIP REGULATION (ASR)

is developed to prevent loss of traction with the road. This prevents skidding, allowing the coach to start moving even in difficult road conditions. It also enhances driving safety on slippery surfaces and prevents excessive wear of the tyres.

ELECTRONIC BRAKING SYSTEM (EBS)

offers the highest level of safety for the driver during braking. It is integrated into an electronic system combining the brake controls, ABS and ASR to produce superior results over shorter braking distances and lower levels of disc wear.

ELECTRONIC STABILITY SYSTEM (ESP)

protects your coach in challenging road conditions. It manages the engine's operating system to provide different levels of traction for each wheel. Combined with different braking power for individual wheels this provides the optimum level of traction with road and prevent loss of control in the event of sudden steering interventions and sharp cornering.

ADVANCED EMERGENCY BRAKING SYSTEM (AEBS)

offers automatic braking capability in case of danger. It automatically intervenes in response to sudden developments which pose a risk of a crash, and helps prevent or reduce the impact of potential crashes.

LANE DEPARTURE WARNING SYSTEM (LDWS)

alerts the driver with both an audio and vibrating warning whenever the coach leaves its current lane. The system helps the driver to stay within the lane and alerts him/her if the coach veers dangerously.
